Key Word Index Volume 22

Amino acid transmitter; High performance liquid chromatography; Cerebellar cell culture, 173
Amphetamine; Video image analysis of behavior; Turning behavior; Asymmetry; Locomotion; Automated measurement; 6-Hydroxydopamine; Basal ganglia; Apomorphine; Recovery of function, 13
Amplitude; Period; Spectral analysis; Time series; Superimposed waves; Non-stationarity, 79
Anterograde axonal tracer; *Phaseolus vulgaris* leucoagglutinin; *Phaseolus vulgaris* agglutinin, P-form; Immunohistochemistry; Retinofugal projection; Striatonigral pathway, 1
Apomorphine; Video image analysis of behavior; Turning behavior; Asymmetry; Locomotion; Automated measurement; 6-Hydroxydopamine; Basal ganglia; Amphetamine; Recovery of function, 13
Apomorphine; Conditioning; Rotation; 6-Hydroxydopamine, 253
Asymmetry; Video image analysis of behavior; Turning behavior; Locomotion; Automated measurement; 6-Hydroxydopamine; Basal ganglia; Apomorphine; Amphetamine; Recovery of function, 13
Automated measurement; Video image analysis of behavior; Turning behavior; Asymmetry; Locomotion; 6-Hydroxydopamine; Basal ganglia; Apomorphine; Amphetamine; Recovery of function, 13

Barrel field; Template; Cortical area; Mouse; Rat, 113
Basal ganglia; Video image analysis of behavior; Turning behavior; Asymmetry; Locomotion; Automated measurement; 6-Hydroxydopamine; Apomorphine; Amphetamine; Recovery of function, 13
Batrachotoxin; Spinal cord cell; Membrane potential; Flow cytometry; Voltage-sensitive dye, 203
Beveling; Bubble number; Microinjection pipet; Microelectrode; Patch pipet; Fire-polishing, 161
Beveller; Quartz; Microelectrode; Ion-selective microelectrode; Silanization; Microelectrode puller, 57
Blood pressure; Catheterization; Vascular-access-port; Jugular vein; Catecholamine, 141
Brain slice; Horseradish peroxidase; Pressure injection; Intracellular micropipet; Electrophysiology; Light and electron microscopy, 181
Bubble number; Microinjection pipet; Microelectrode; Patch pipet; Fire-polishing; Beveling, 161

Calcium current; Synaptic transmission; Voltage clamp; Transmitter release, 195
Calibration procedure; Quantitative receptor autoradiography; Image analysis; Computerized image processing; Mathematical model; Non-linear curve fitting; Logistic function, 233
Carbon fiber microelectrode; Nafion; Electrocoating; Selectivity; Differential pulse voltammetry; Chronoamperometry, 167
Catecholamine; Indoleamine; Substance P; Thyrotrophin releasing hormone; Spinal cord, 31
Catecholamine content; Mechanical slicing; Frozen brain tissue; Human brain, 41
Catecholamine; Catheterization; Vascular-access-port; Jugular vein; Blood pressure, 141
Catheterization; Vascular-access-port; Jugular vein; Blood pressure; Catecholamine, 141
Cerebellar cell culture; High performance liquid chromatography; Amino acid transmitter, 173
Cerebral artery; Ischemia; Evoked potential; Tetrazolium, 133
Cerebrospinal fluid; Intrathecal; Reservoir; Rabbit, 47
Cholera B-chain; Peroxidase; Conjugate; Neuron; Tracing, 189
Chronoamperometry; Nafion; Carbon fiber microelectrode; Electrocoating; Selectivity; Differential pulse voltammetry, 167
Computerized image processing; Quantitative receptor autoradiography; Image analysis; Calibration procedure; Mathematical model; Non-linear curve fitting; Logistic function, 233
Conditioning; Rotation; Apomorphine; 6-Hydroxydopamine, 253
Conjugate; Cholera B-chain; Peroxidase; Neuron; Tracing, 189
Cortical area; Barrel field; Template; Mouse; Rat, 113
Cross-correlation histogram; Motor unit; Synchronization index, 125
Cryostat technique, Microwave irradiation fixation; Formaldehyde effect; Processing of nervous tissue, 97
CSF, *see* Cerebrospinal fluid

Differential pulse voltammetry; Nafion; Carbon fiber microelectrode; Electrocoating; Selectivity; Chronoamperometry, 167
Dissociated neurons; Patch-clamp; Voltage-clamp, 53
Dopamine; Pressure ejection; Microiontophoresis; In vivo electrochemistry, 147
Dopamine; Model; Simulation; Striatum; Metabolism; Release; Electrical stimulation; Uptake, 239
Dorsal root ganglion; Nerve injury; Ricin; Sciatic nerve; Suicide transport, 103

Electrical stimulation; Unmyelinated axon; Mathematical model, 65

Electrical stimulation; Dopamine; Model; Simulation; Striatum; Metabolism; Release; Uptake, 239
Electrocoating; Nafion; Carbon fiber microelectrode; Selectivity; Differential pulse voltammetry; Chronoamperometry, 167
Electrophysiology; Horseradish peroxidase; Pressure injection; Intracellular micropipet; Brain slice; Light and electron microscopy, 181
Epinephrine; Memory; Hormone; Passive avoidance, 27
Evoked potential; Cerebral artery; Ischemia; Tetrazolium, 133

Fire-polishing; Bubble number; Microinjection pipet; Microelectrode; Patch pipet; Beveling, 161
Flow cytometry; Spinal cord cell; Membrane potential; Voltage-sensitive dye; Batrachotoxin, 203
Formaldehyde effect; Microwave irradiation fixation; Cryostat technique; Processing of nervous tissue, 97
Freeze-dried tissue; Monoclonal antibody; Nervous system, 91
Frozen brain tissue; Mechanical slicing; Catecholamine content; Human brain, 41
Frozen section; Silver impregnation; Nerve center; Neuronal soma; Rapid impregnation, 9

Grating stimulus; Mechanoreceptor; Stimulator, 215

High performance liquid chromatography; Amino acid transmitter; Cerebellar cell culture, 173
Hormone; memory; Passive avoidance; Epinephrine, 27
Horseradish peroxidase; Pressure injection; Intracellular micropipet; Electrophysiology; Brain slice; Light and electron microscopy, 181
HPLC, *see* High performance liquid chromatography
Human brain; Mechanical slicing; Frozen brain tissue; Catecholamine content, 41
6-Hydroxydopamine; Video image analysis of behavior; Turning behavior; Asymmetry; Locomotion; Automated measurement; Basal ganglia; Apomorphine; Amphetamine; Recovery of function, 13
6-Hydroxydopamine; Conditioning; Rotation; Apomorphine, 253

Image analysis; Quantitative receptor autoradiography; Computerized image processing; Calibration procedure; Mathematical model; Non-linear curve fitting; Logistic function, 233
Immunohistochemistry; Anterograde axonal tracer; *Phaseolus vulgaris* leucoagglutinin; *Phaseolus vulgaris* agglutinin, P-form; Retinofugal projection; Striatonigral pathway, 1
In vivo electrochemistry; Pressure ejection; Microiontophoresis; Dopamine, 147
Incisor; Pain; Tooth-pulp; Rat; Method; Stimulating electrode; Jaw-opening reflex, 73
Indoleamine; Catecholamine; Substance P; Thyrotrophin releasing hormone; Spinal cord, 31
Intracellular micropipet; Horseradish peroxidase; Pressure injection; Electrophysiology; Brain slice; Light and electron microscopy, 181
Intrathecal; Cerebrospinal fluid; Reservoir; Rabbit, 47
Ion-selective microelectrode; Quartz; Microelectrode; Beveller; Silanization; Microelectrode puller, 57
Ischemia; Cerebral artery; Evoked potential; Tetrazolium, 133

Jaw-opening reflex; Pain; Tooth-pulp; Rat; Method; Stimulating electrode; Incisor, 73
Jugular vein; Catheterization; Vascular-access-port; Blood pressure; Catecholamine, 141

Light and electron microscopy; Horseradish peroxidase; Pressure injection; Intracellular micropipet; Electrophysiology; Brain slice, 181
Locomotion; Video image analysis of behavior; Turning behavior; Asymmetry; Automated measurement; 6-Hydroxydopamine; Basal ganglia; Apomorphine; Amphetamine; Recovery of function, 13
Logistic function; Quantitative receptor autoradiography; Image analysis; Computerized image processing; Calibration procedure; Mathematical model; Non-linear curve fitting, 233

Mapping; Retina; Wholemount, 119
Mathematical model; Electrical stimulation; Unmyelinated axon, 65
Mathematical model; Quantitative receptor autoradiography; Image analysis; Computerized image processing; Calibration procedure; Non-linear curve fitting; Logistic function, 233
Mechanical slicing; Frozen brain tissue; Catecholamine content; Human brain, 41
Mechanoreceptor; Grating stimulus; Stimulator, 215
Membrane potential; Spinal cord cell; Flow cytometry; Voltage-sensitive dye; Batrachotoxin, 203
Memory; Hormone; Passive avoidance; Epinephrine, 27
Metabolism; Dopamine; Model; Simulation; Striatum; Release; Electrical stimulation; Uptake, 239
Method; Pain; Tooth-pulp; Rat; Stimulating electrode; Incisor; Jaw-opening reflex, 73
Microelectrode; Quartz, Ion-selective microelectrode; Beveller; Silanization; Microelectrode puller, 57
Microelectrode puller; Quartz; Microelectrode; Ion-selective microelectrode; Beveller; Silanization, 57
Microelectrode; Bubble number; Microinjection pipet; Patch pipet; Fire-polishing; Beveling, 161
Microinjection pipet; Bubble number; Microelectrode; Patch pipet; Fire-polishing; Beveling, 161
Microiontophoresis; Pressure ejection; In vivo electrochemistry; Dopamine, 147
Microwave irradiation fixation; Formaldehyde effect; Cryostat technique; Processing of nervous tissue, 97
Model; Dopamine; Simulation; Striatum; Metabolism; Release; Electrical stimulation; Uptake, 239
Monoclonal antibody; Freeze-dried tissue; Nervous system, 91
Motor unit; Synchronization index; Cross-correlation histogram, 125
Mouse; Barrel field; Template; Cortical area; Rat, 113

Nafion; Carbon fiber microelectrode; Electrocoating; Selectivity; Differential pulse voltammetry; Chronoamperometry, 167
Nerve center; Silver impregnation; Frozen section; Neuronal soma; Rapid impregnation, 9
Nerve injury; Dorsal root ganglion; Ricin; Sciatic nerve; Suicide transport, 103
Nervous system; Monoclonal antibody; Freeze-dried tissue, 91
Neuron; Cholera B-chain; Peroxidase; Conjugate; Tracing, 189
Neuronal soma; Silver impregnation; Nerve center; Frozen section; Rapid impregnation, 9
Neurophysiology; Tactile; Stimulator; Psychophysics; Texture, 221
Non-linear curve fitting; Quantitative receptor autoradiography; Image analysis; Computerized image processing; Calibration procedure; Mathematical model; Logistic function, 233
Non-stationarity; Amplitude; Period; Spectral analysis; Time series; Superimposed waves, 79

6-OHDA, *see* 6-Hydroxydopamine

Pain; Tooth-pulp; Rat; Method; Stimulating electrode; Incisor; Jaw-opening reflex, 73
Passive avoidance; Memory; Hormone; Epinephrine, 27
Patch pipet; Bubble number; Microinjection pipet; Microelectrode; Fire-polishing; Beveling, 161
Patch-clamp; Dissociated neurons; Voltage-clamp, 53
Period; Amplitude; Spectral analysis; Time series; Superimposed waves; Non-stationarity, 79
Peroxidase; Cholera B-chain; Conjugate; neuron; Tracing, 189
PHA-L, see *Phaseolus vulgaris* leucoagglutinin
PAA-P, see *Phaseolus vulgaris* agglutinin, P-form
Phaseolus vulgaris leucoagglutinin; Anterograde axonal tracer; *Phaseolus vulgaris* agglutinin, P-form; Immunohistochemistry; Retinofugal projection; Striatonigral pathway, 1
Phaseolus vulgaris agglutinin, P-form; Anterograde axonal tracer; *Phaseolus vulgaris* leucoagglutinin; Immunohistochemistry; Retinofugal projection; Striatonigral pathway, 1
Pressure ejection; Microiontophoresis; In vivo electrochemicstry; Dopamine, 147
Pressure injection; Horseradish peroxidase; Intracellular micropipet; Electrophysiology; Brain slice; Light and electron microscopy, 181
Processing of nervous tissue; Microwave irradiation fixation; Formaldehyde effect; Cryostat technique, 97
